## Notes to customers on System Requirements

- System Requirements are minimum guidelines. Actual requirements will vary based on your system configuration, installed applications and usage.
- If system requirements are not met, the customer assumes responsibility of performance and compatibility issues as a result thereof.
- As the customer grows their business and data over time, it is possible that system upgrades would need to occur (for example, memory and disk subsystem).
- Customer assumes responsibility for ongoing maintenance, virus protection, data backup and security of their system.

## Endnotes

---

<sup>1</sup> By default, Newmarket will configure SQL Server to perform a complete Delphi database backup on a nightly basis. With this optional array you may configure additional backups to occur during business hours.

<sup>2</sup> 32-bit or 64-bit supported, see Microsoft's system requirements for specific information and limitations of their products.

<sup>3</sup> Outlook Web Access (OWA) and Outlook Express not supported

<sup>4</sup> Windows XP Home Edition is not supported.
